WK06 - How is this course going? Click here to reply.
by [Rick Jerz](#) - Tuesday, September 22, 2020, 3:19 PM

I find it useful to get some feedback about the course at this point. For example, you could let me know if you like the course, are you learning, have you been able to apply anything that you have learned, is there anything that I might be able to improve, are you struggling with anything, etc. You can say whatever you would like to say, and be as long or as brief as you wish (for example, one word such as fine, terrible, okay.)

Re: WK06 - How is this course going? Click here to reply.
by [Gabriela Lawrence](#) - Tuesday, September 22, 2020, 3:46 PM

Hi Dr. Jerz, I appreciate that this course lets me study at my own pace. Week 1 was a lot to handle, but since then I think the lecture videos and other material and the provided excel spreadsheet have helped me understand this material quickly. I have not used the textbook very much, and I have not needed to communicate with other students. Will the exam's difficulty be in line with the weekly problems?

[Permalink](#) [Show parent](#)

Re: WK06 - How is this course going? Click here to reply.
by [Rick Jerz](#) - Tuesday, September 22, 2020, 4:23 PM

Yes, the exam questions will be very similar to the problems in our self-assessments. I do not try to surprise students with anything new.

Re: WK06 - How is this course going? Click here to reply.
by [Josh Herchuk](#) - Tuesday, September 22, 2020, 5:00 PM

In a course like this, it is my belief that the instructor and the manner in which material is presented is hugely important. You do a phenomenal job and your Excel tools make problem solving (relatively) easy. You have clearly put significant effort in to making analytics manageable. Thank you for all of that!

[Permalink](#) [Show parent](#)

Re: WK06 - How is this course going? Click here to reply.
by [Matt Syedahamed](#) - Tuesday, September 22, 2020, 5:56 PM

Overall, this course has been growing very well. I love the step by step breakdown that your video tutorials have for Excel models. I am not very tech savvy, and have been learning how to work around Excel as a result of this class. Analytics seemed like a subject I did not see myself mastering prior to taking this course, however, I am getting more and more confident as the weeks go by. 10/10 score

[Permalink](#) [Show parent](#)

Re: WK06 - How is this course going? Click here to reply.
by [Brynne Liu](#) - Tuesday, September 22, 2020, 8:36 PM

Have really enjoyed the course. Lecture videos are great and the reinforcement activities/lectures have been useful. I have applied the statistics to analyze average freight rates on \$/mile basis. I have also used some of the visualization tools on Tableau to visualize which commodities I have shipped the most in my previous year.

Re: WK06 - How is this course going? Click here to reply.
by [Jajja Richter](#) - Tuesday, September 22, 2020, 10:57 PM

Hi Dr. Jerz,
Echoing Barrett's comments, Week 1 was a lot to handle, but since then, the content has been manageable from week to week. I like how clear the excel models are with how to enter, interpret, and plot the data and I like being able to retake the quizzes. I know that my learning improves each time I take them. As with any class, exams tend to have their own unique format/feel. A practice exam would be beneficial just to get a feel for what exams will be like in this course and get more feedback. Otherwise, everything is going well.

Re: WK06 - How is this course going? Click here to reply.
by [David Geers](#) - Tuesday, September 22, 2020, 11:27 PM

I enjoy the fact that you have broken up the video lengths into a very manageable structure, working full time I find myself spending short periods throughout the week listening to them once or twice before doing the quizzes. I also like the fact you have a bank of questions in the quizzes and it throws you a curve ball once in a while if you aren't paying attention, but allows you to follow up and redo the quizzes over. The Excel sheets are also nice, if I had to create them myself they would not be as organized.

Re: WK06 - How is this course going? Click here to reply.
by [Virag Rohrsen](#) - Wednesday, September 23, 2020, 10:51 AM

Thus far, I have really enjoyed this class and greatly appreciate the excel models. Creating tools like these takes time, creative thought, and strict attention to detail. Most of all these are not easy to create but have tremendous value, and allow time to interpret data vs constructing data.

Additionally, I think that the format of this class has been well done to include the pace. There is a lot of digest week over week but not so much that the student is unable to comprehend the concepts and just focused on trying to get work done.

Re: WK06 - How is this course going? Click here to reply.
by [Jacob Jones](#) - Saturday, September 26, 2020, 10:10 AM

This is my first asynchronous class so that has been some getting use to for me. I use a lot of excel for showing reports and such, so it has been nice to apply some of the excel information that we have learned thus far. The class is laid out very logically which I appreciate and the organization helps with keeping me on track.

[Permalink](#) [Show parent](#)

Re: WK06 - How is this course going? Click here to reply.
by [Nicole Canada](#) - Saturday, September 26, 2020, 6:15 PM

So far, it's going very well. I really appreciate you providing us with the Excel models and walking us through how to use them. I like that this is asynchronous so I can study and do work on my own time. The content load is manageable for people like myself that are working full time. I cannot thank you enough for not having us calculate the z values. I absolutely hated doing that in a previous stats class and felt like it was such a waste of time and energy. Your way is so much more efficient.

Re: WK06 - How is this course going? Click here to reply.
by [Brandi Hobbs](#) - Saturday, September 26, 2020, 7:00 PM

I would say that you do a great job at taking us through the problems in Excel and lecturing the concepts. I was nervous in the beginning because I'm an Excel rookie, but you do a thorough job of walking us through the examples and your formulas. There were times in the beginning when I had to pause and/or rewind to keep up with your Excel movements, but I could tell you did it to respect the class time limit. It wasn't a big deal for me to go back because I wanted to make sure I was doing it right. I'm sure most others had no issues with that.

Overall I've really enjoyed learning the models through Excel. Not only does it make me a better Excel user, but it helps me understand the problems better when we apply them to real life examples. Looking forward to learning more.

One last thing, I noticed in your Reinforcement-03 video that you reference the "Let's Make a Deal" problem and you state that the show no longer airs, but it actually does. Wayne Brady has been hosting it on CBS since 2009 😊 Not as good as the classic with Monty Hall, but it's still just as silly. Just thought you'd like to know in case you are free during the daytime watch and shout out probabilities at the contestants!

[Permalink](#) [Show parent](#)

Re: WK06 - How is this course going? Click here to reply.
by [Rick Jerz](#) - Sunday, September 27, 2020, 7:51 AM

Yep, Shilo, when I made that video I thought "Let's make a Deal" was gone. But other students have told me that it is still on TV. I think that the current show has been modified from the original due to this problem of knowing what one should always do.

I will have to try to watch it. Thanks.

Re: WK06 - How is this course going? Click here to reply.
by [Derek Kucharz](#) - Monday, September 28, 2020, 9:00 PM

The excel models certainly are very complex and took a lot of work to create. They are very helpful to do the calculations so students can focus on the actual theory behind them. The course is well designed, but it would be nice to have the ability to get some feedback after the Self-Assessments. I find that I get the correct answer, but would like to verify that I got the correct answer for the right logic. So, maybe feedback on those that were correct, but not providing feedback to those incorrect? Or feedback on what concept to study on those that are incorrect? Overall, great course so far, but worried about the exam since I can't "think" I am getting it right and understanding the concept.

[Permalink](#) [Show parent](#)

Re: WK06 - How is this course going? Click here to reply.
by [Rick Jerz](#) - Tuesday, September 29, 2020, 9:22 AM

Good suggestion Bou, about feedback on only correctly answered questions.

My problem with feedback is that the author doesn't provide it, so I would have to go into each question bank question, of which there might be around 100 per chapter, and manually type the feedback myself. (A lot more effort than it took us to enter 100 M&M weights!)

Re: WK06 - How is this course going? Click here to reply.
by [Tyler Tully](#) - Tuesday, September 29, 2020, 11:26 PM

I continue to like the flexibility of this course, as well as the effort you've placed on actually solving problems through Excel. This has definitely allowed me to gain some efficiencies in my day to day work. Thank you!

[Permalink](#) [Show parent](#)

Re: WK06 - How is this course going? Click here to reply.
by [Tyler Blackhurst](#) - Thursday, October 1, 2020, 1:09 PM

So far so good! There's been a good balance between terms that are familiar but introducing the challenge of learning new ways to do things, using your excel files, different tools and applying new concepts has been great. I like the length of the videos and being able to do excel problems while you are doing the walk-throughs.

On a side note, I am a marketing manager and I have always been grateful for my analytics team that I work closely with; however, I have let them know how much more I am appreciative of their partnership based on what I've learned so far in this class. It's also helped me to communicate using similar language and I am able to understand the analysis/problems they are putting together for different marketing pieces that we are creating.

Re: WK06 - How is this course going? Click here to reply.
by [Rick Jerz](#) - Saturday, October 3, 2020, 8:01 AM

Delaney, I think that we learn best when a course is paced, to keep you active, yet provides you the flexibility to take care of other needs in your life. Sometimes it is difficult to be "in class" at an exact point in time, like Monday evenings. This is why I believe in the asynchronous online model. And these discussion forums still bring us all together.

Re: WK06 - How is this course going? Click here to reply.
by [Brandie Clark](#) - Saturday, October 3, 2020, 5:46 PM

Probably one of the most organized graduate-level courses I've ever taken - I'm really enjoying it so far. The excel spreadsheets are so helpful. very easy to understand and apply to problems. I really enjoy the assessments that go along with each week's topic - video lectures and assessment help to reinforce the concepts learned.

One suggested improvement would be having one live session (synchronous) to review the concepts and work on problems like/similar to those covered on the exams. This live interaction would give students the opportunity to engage with you and other students - i.e. ask questions and work problems together.

[Permalink](#) [Show parent](#)

Re: WK06 - How is this course going? Click here to reply.
by [Ge Vandegrift](#) - Saturday, October 3, 2020, 6:18 PM

I enjoy the flexibility of this course and how I can work through the material when it works best in my schedule and therefore give the course my full attention. I also love the structure and focus on excel (rather than tedious calculations that are not as easily integrated into real life).

Re: WK06 - How is this course going? Click here to reply.
by [Adam Diep](#) - Monday, October 5, 2020, 8:36 PM

I have enjoyed the class thus far. I have learned a great deal about the broad principles of statistics and business analytics. I find your spreadsheets to be incredibly helpful and time-friendly. My only fear is that with the spreadsheets, I am losing the process of deeply learning what information is being put into the calculations and work. Obviously, the more practice, the more I understand, but I would say that is my only personal concern. The presentation of the course is fantastic and allows me to complete tasks timely and at my own pace. I appreciate your desire to help each student. Looking forward to completing the rest of the semester.

[Permalink](#) [Show parent](#)

Re: WK06 - How is this course going? Click here to reply.
by [Rick Jerz](#) - Monday, October 5, 2020, 9:36 PM

I understand, Chase. The textbook is a great resource for those wanting "deeper" learning, along with all the equations and the traditional table approach. You will always have my Excel models. Also, being able to explore what subtle or big data changes do to results, meaning "what-if analysis," is much better done with my Excel models and can provide a deeper understanding than the traditional methods.

Re: WK06 - How is this course going? Click here to reply.
by [Fabiola Bortscheller](#) - Monday, October 5, 2020, 10:01 PM

Hello!

I am enjoying the course so far. The excel models are incredible and have been really helpful throughout the course. I have also enjoyed being able to make mistakes and retake the assessments and problem sets. This has helped me work through items I am not understanding and more effectively learn the material at my own pace. It was also helpful to have these items reopened in preparation for the test, as going over problems was one of the most effective ways to prepare. The reinforcement videos were also really helpful to get some practice. I would like to have more real world examples included and understand more how I can apply these ideas in my current work. I am hopeful as we keep moving through the content, that image will become more clear for me. The pace of the course has also been manageable. I appreciate the amount of time we have to work through each week as it provides a lot of flexibility with a difficult work schedule. Thank you!

[Permalink](#) [Show parent](#)

Re: WK06 - How is this course going? Click here to reply.
by [Brock Mascardo](#) - Tuesday, October 6, 2020, 10:42 AM

Similar to many others' responses, I think the excel models are great. If you understand the concepts behind them, they make it very straightforward to solve problems. It's a good textbook - I usually complete the readings before the concept quizzes and then watch your lecture videos before the problem quizzes and it's been a good system. I like that we have the option to take quizzes multiple times and take the best score from our attempts. I like the way the first exam was structured, based on solving problems from each of the weekly modules, and I appreciate you opening the problem quizzes to practice and review prior to the exam.

Re: WK06 - How is this course going? Click here to reply.
by [Nathan Rueger](#) - Tuesday, October 6, 2020, 6:50 PM

Dr. Jerz,

As an English major for my undergraduate I was worried about how I would fare in a graduate level mathematics based course. However, with the pace and structure I have found myself adapting and learning. I was worried with it being online and my own personal ability to learn. But with your notes, lecture material and reinforcement activities I find myself being able to grasp the material. As a creature of habit, I also enjoy having a routine with this course. I know when things are due and I am able to structure my week around it. I am able to take the past week, figure out what worked and what didn't with my personal schedule, and adapt for the next week. I also enjoy that the materials for future weeks are available allowing us to work at the pace we feel most comfortable with. Overall, my thoughts are that the course has been accessible and as I delve further in my field, I look forward to applying the knowledge I have gained!
